SHALIN SUNIL KUMAR

+91-7010961953 | shalinsunil1@gmail.com | LinkedIn | Portfolio | GitHub

Professional Summary

Software Engineer with 1+ year of professional development experience building enterprise web applications. Skilled in Python, JavaScript, TypeScript, React, FastAPI, Node.js, SQL, Docker, and API integrations. Experienced in secure backend services, database-driven applications, access control, workflow automation, AI integrations, privacy-focused processing, and deployment.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, SQL
Frontend: React, Next.js, Tailwind CSS
Backend: FastAPI, Node.js, Express.js, REST APIs, JWT authentication
Databases: PostgreSQL, MySQL
DevOps and Testing: Docker, Docker Compose, Git, GitHub Actions, Jenkins, CI/CD, AWS, Postman, Playwright
AI and Privacy: OpenAI API, Ollama, OpenRouter, Microsoft Presidio, spaCy, PaddleOCR
Integrations: Microsoft Graph API, SMTP, SQLAlchemy, Alembic

Experience

Software Developer - IARM Information Security *Apr 2026 – Present*

- Develop and maintain internal business applications, data-management features, backend functionality, and API integrations.
- Support workflow automation, email notifications, database troubleshooting, Docker builds, deployment scripts, and application connectivity.

Full Stack Developer Intern - Nordic Solutions *Jun 2023 – Nov 2023*

- Developed Python services, data-processing workflows, and backend integrations for full-stack applications.
- Worked with Node.js, Express.js, and REST APIs; supported testing, deployment, and integration troubleshooting.

Projects

AI Research and Productivity Workspace
Technologies: React, TypeScript, Next.js, Tailwind CSS, FastAPI, PostgreSQL, SQLAlchemy, Alembic, Docker

- Build an AI research workspace with configurable providers, searchable conversation history, and exportable responses using OpenAI API, Ollama, and OpenRouter.
- Integrate REST APIs and PostgreSQL persistence with sensitive-data detection using Microsoft Presidio and spaCy, plus OCR text extraction using PaddleOCR.

Cloud Infrastructure and Asset Inventory Platform
Technologies: Python, FastAPI, MySQL, SQLAlchemy, Alembic, JWT, Docker

- Develop an inventory system for tracking cloud resources, servers, software licenses, ownership, configuration changes, and resource lifecycles.
- Implement REST APIs, normalized MySQL models, JWT authentication, role-based permissions, audit logs, inventory search, and scheduled reports.
- Add data validation, schema migrations with Alembic, automated API tests, and Docker-based deployment.

Event Registration and Notification Platform
Technologies: JavaScript, React, Node.js, Express.js, PostgreSQL, REST APIs, Microsoft Graph API, SMTP

- Build event scheduling and registration with attendee records, capacity limits, registration status, and reports.
- Develop REST APIs and PostgreSQL data models; automate confirmation emails and reminders using Microsoft Graph API and SMTP.
- Add input validation, duplicate-notification prevention, delivery logs, automated tests, and containerized deployment.

Developer Project Quality Dashboard
Technologies: React, TypeScript, Node.js, Express.js, PostgreSQL, Playwright, GitHub Actions

- Develop a dashboard to track project build status, automated test results, deployment history, and development activity across repositories.
- Create REST APIs and PostgreSQL data models for build records, test summaries, project settings, and historical metrics.
- Add interactive status charts, filtering, report exports, Playwright end-to-end tests, and GitHub Actions workflows for continuous integration.

Education

Vellore Institute of Technology (VIT), Chennai *Graduated 2025*
B.Tech in Computer Science Engineering | CGPA: 8.10/10

Certification

The Complete 2024 Web Development Bootcamp - Dr. Angela Yu | Jan 2025
