Professional Summary

Software Engineer with 1+ year of professional development experience building enterprise web applications. Skilled in Python, TypeScript/React, FastAPI, SQL, Docker, and API integrations. Built privacy-first AI workflows, role-based access controls, ITSM ticketing, data-management modules, and automated email systems for internal organizational use.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, SQL
Frontend: React, Next.js, Tailwind CSS
Backend: FastAPI, Node.js, Express.js, REST APIs, JWT authentication
Databases: PostgreSQL, MySQL, MongoDB
DevOps and Testing: Docker, Docker Compose, Git, GitHub Actions, Jenkins, CI/CD, AWS, Postman, Playwright
AI and Privacy: OpenAI API, Ollama, OpenRouter, Microsoft Presidio, spaCy, PaddleOCR
Integrations: Microsoft Graph API, SMTP, SQLAlchemy, Alembic

Experience

Software Developer - IARM Information Security *Apr 2026 - Present*

- Maintain internal business applications used across the organization; develop data-management and ticketing functionality, automate email notifications, and troubleshoot backend/database issues, Docker builds, deployment scripts, and company-network connectivity.

Full Stack Developer Intern - Nordic Solutions *Jun 2023 - Nov 2023*

- Contributed to two full-stack applications by developing Python services, data-processing workflows, and backend integrations.
- Worked with Node.js/Express, REST APIs, and MongoDB schemas; supported testing, deployment tasks, and integration troubleshooting.

Projects

Moodi - Privacy-First Enterprise AI Platform
Technologies: React, TypeScript, FastAPI, PostgreSQL, Presidio, PaddleOCR, Docker

- Built and deployed a ChatGPT-style AI platform for internal employee use, integrating OpenAI, Ollama Cloud, and OpenRouter, with web search, image generation/editing, interactive visual responses, and document generation in 10 formats.
- Implemented a privacy gateway that masks personal data and secrets before external AI calls; improved detection of Indian person and organization names using custom lists and fuzzy matching, and added OCR-based image redaction with verification and fail-closed handling.
- Implemented organization/team RBAC, encrypted provider credentials, PostgreSQL chat history, usage limits, rate limiting, and audit logs; containerized the frontend, backend, privacy service, and database with Docker Compose.

IARM HUB v2 - Data Management, ITSM and Compliance Platform
Technologies: Python, MySQL, JavaScript, REST APIs, Docker Compose

- Built organization-wide data-management functionality for employee records, hardware/software and license inventories, cloud/network assets, access reviews, and compliance evidence, using a 57-table MySQL database.
- Developed an ITSM ticketing tool for service requests, incidents, problems, and change requests with SLA tracking, comments/attachments, and CISO approval workflows; implemented JWT-based access control across five roles.
- Created reusable CRUD/API components across 30+ data modules with cross-table synchronization; implemented Microsoft Graph/SMTP notifications with deduplication, retries, and delivery logs, plus full-system backup/restore with SHA-256 integrity checks.

PhishPrep - Phishing Simulation and Security Awareness
Technologies: Microsoft Graph API, SMTP, Email Automation

- Helped build PACT (Phishing Awareness Campaign Training), automating follow-up training for employees who click simulated phishing emails using Microsoft Graph API and SMTP; also contributed to the sign-in experience.
- Contributed to simulation UI concepts for email, SMS, voice, Microsoft Teams, QR-code, and deepfake scenarios, supporting PhishPrep's multichannel awareness experience.
- PhishPrep reports platform-level outcomes of up to 60% lower phishing click rates, 3x more suspicious-email reporting, and 80% fewer repeat clickers within three months (company-reported metrics).

Education

Vellore Institute of Technology (VIT), Chennai *Graduated 2025*
B.Tech in Computer Science Engineering | CGPA: 8.10/10

Certification

The Complete 2024 Web Development Bootcamp - Dr. Angela Yu | Jan 2025
